

Personal Statement.

After majoring in Digital Production Design and Development at Barnsley collage, I have decided to further advance my education by directing my attention to further developing my understanding in Cyber Security. This is due to my key interest in Both ethical hacking and programming aspect of Cyber Security. My interest in Cyber Security stems from a curiosity in security features implemented in order to protect systems, networks and programs from digital attack which involve and are not limited to accessing, changing, or destroying sensitive information as well as the method of taking control of other devices without coming in physical contact. After much consideration, I have decided to advance my education in Cyber Security due to various reasons which mainly include vast carrier opportunities that are been continuously provided in this industry as well as a job satisfaction on my part as it is more likely to give me a sense of fulfilment compared to other courses and carriers.

Within my first year at Barnsley collage, studying Digital Production Design and Development, I began to have a deeper understanding of the digital world because of the course I was studying. Due to this I began to develop an interest in Digital security which has ultimately led to my decision to Major in Cyber Security. By majoring in Digital production design and development, I have developed key skills required to be successful in the digital world such as key data analysis, excellent presentation abilities and operating systems. My Data analysis skill stems from an understanding in data which has been honed through data classes which I had undergone as part of my course. My Presentation capabilities stem from a constant requirement to produce presentation for all topics in business class.

As part of my T level course, I am required to have undergone a total of 315 placement hours to help prepare me for the real world. This is required to be done in a place of work that feats the course i am learning and preparing for which in my cause is the world of IT. My chosen place of placement is a fantastic electronic repair store called Repair IT. This establishment is located at 2Regent St S, Barnsley S70 2HT and is an enterprise dedicated to resolving technical issue that may occur with electronical appliances from Laptops to Pc and many more. I have chosen this establishment as my place of placement due to its outstanding customer reviews as well as their dedication to their expertise. My completing my Work placement hours at Repair IT, I can confidently say that I have developed hands on experience within this sector as I have been often required to assist in attending to customers as well as helping with the technical problems. Through my constant interaction with both customer and colleagues, i have further improved my Communicatiuon and problem-solving skills.

During my leisure times, I often go to the gym as I consider myself to be a gym enthusiast Aiming to achieve a stunning and applaudable physic. Outside of the gym, i can also be found in the kitchen during my spare times as I like to adventure in the world of food and cuisines. My interest in cuisines and meals stems from my goals within the gym which required me to monitor what I consume without compromising the taste and restricting my consumption.

After Completing my Course at your university, i intend of diving straight into the world of technology and building a saucerful career. My current aim to be able to work within a well-respected and valued establishment like Roll Royce. By having a place within such an establishment, I can confidently say that I would achieve a sense of fulfilment as at that point, i would have achieve my career goals as well as my personal goals.
